

**CITIZENS FOR FREE ELECTIONS (CFFE)
Election 2020**

Take It Back!™

Verify and Validate the Vote

We want a free and fair election. We believe it is imperative to examine the current election results manually and, through a bipartisan process, confirm or deny that the election is valid in the six hotly contested states. If we start immediately, we can complete such an audit before the end of December. The Federal Government should pay for this massive undertaking and be completely transparent with American citizens. The Government should conduct this in a fully and effectively observable way for both parties at all times.

The Problem:

1. Overwhelming evidence of election irregularities
1. Illegal election processes have been confirmed
2. Half or more of US citizens believe election was stolen

Immediate Focus:

2. Stay or enjoin elector selections in all contested states
3. Continue Investigations into illegal election processes including, but not limited to, illegal votes, cyber security, criminal activity, and chain of custody lapses
4. In six contested states do a comprehensive audit meaning:
 - a. Verify voter rolls (remove deceased, moved, repeated, and illegal votes)
 - b. Verify voter signatures
 - c. Verify recorded votes cast versus voter intent
 - d. Verify voters were eligible to vote
 - e. Investigate any ballot harvesting (drop box, nursing homes, etc.)
 - f. Comprehensive hand recount & tally

Moving forward:

1. Complete investigation using special prosecutor
2. Continue audit of processes and electronics
3. Secure election process to eliminate future fraud
